     This listing of the claims will replace all prior versions

and listings of claims in the application:

Listing of the claims:

     Claim 1 (currently amended): A computer security protection

comprising an ATM/ALERT system for responsive action to ATM

transactions and other security accesses made under duress, said

system which interacts interacting with established software to:

     (a) recognize first-entry of a valid identification,

     (b) determine if a second-entry of a valid identification is

required in a user profile wherein:

          (i) if second-entry of a valid identification is not

required, which will then allow a requested action is allowed to

occur via the established software; and;

          (ii) if second entry of a valid identification is

required, second-entry of valid identification is requested

followed by recognition of second-entry of valid identification

to allow a requested action to occur via the established

software; and
